### ✓ Mid description (500 char)

Aqurate Personalize helps eCommerce shops increase the conversion rate and average order value, by offering their visitors a personalized online shopping experience.

Using AI-driven technology, Aqurate delivers highly targeted product recommendations to each customer, based on their previous interactions with the shop.

There are over 10 product recommendation types, such as cross-sell and similar product recommendations, which can be displayed on the website (product detail page, cart), app, or sent by email.

Aqurate Personalize delivers up to 23% increase in revenue, with results that are independently verified through rigorous A/B testing.

### ✓ For PR purposes

Aqurate ajută la colectarea datelor cu care interacționează utilizatorii magazinelor online și la introducerea acestora în motorul de recomandare de produse. Soluția AI este bazată pe analizarea și interpretarea unor volume mari de date privind comportamentul clienților - produse cumpărate, click-uri, produse adăugate în coș și altele. Aceasta compară acțiunile similare ale diferiților utilizatori și estimează, prin intermediul inteligenței artificiale, ce ar putea prezenta interes pentru fiecare utilizator.

La finalul anului 2023, Aqurate a depășit 3,84 milioane de comenzi procesate prin magazinele online ce folosesc algoritmul său AI de recomandări de produse.

Aqurate Personalize crește veniturile din eCommerce cu până la 23%, prin recomandările de produs generate cu AI, personalizate fiecărui vizitator al site-urilor. Serviciul crește atât rata de conversie din eCommerce, cât și valoarea medie a comenzii.
